

Tune into NetSuite Cloud ERP with Jade Global

A trusted partner, bringing value-added innovative solutions to accelerate your cloud journey.

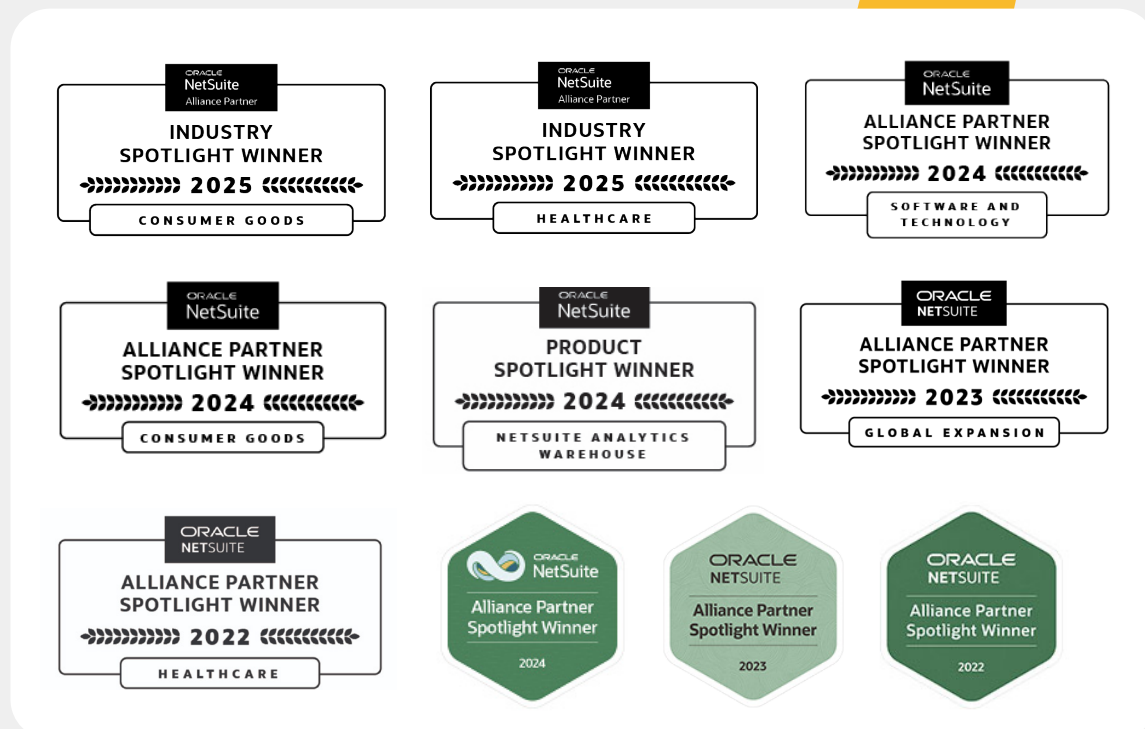

Enterprise-ready business management starts with the world's #1 AI-led cloud ERP.

Enterprises fall behind when legacy, disconnected systems limit their ability to adopt AI and act on real-time insights. They need a unified, intelligent platform that brings finance, operations, and analytics together.

As an award-winning Oracle NetSuite Alliance Partner in the USA, Jade Global delivers end-to-end NetSuite professional services to help organizations streamline operations, improve visibility, and scale with confidence.

Our NetSuite services support the entire ERP lifecycle, from strategy and implementation to optimization and ongoing management, through a single, fully integrated, AI-ready cloud ERP platform.

NetSuite Alliance Partner Spotlight Award Winner

Why NetSuite?

Simplify Financial Management

Access consolidated statements, revenue tracking, and precise budgeting.

Stay Future-Ready

Enjoy seamless updates with customizations intact.

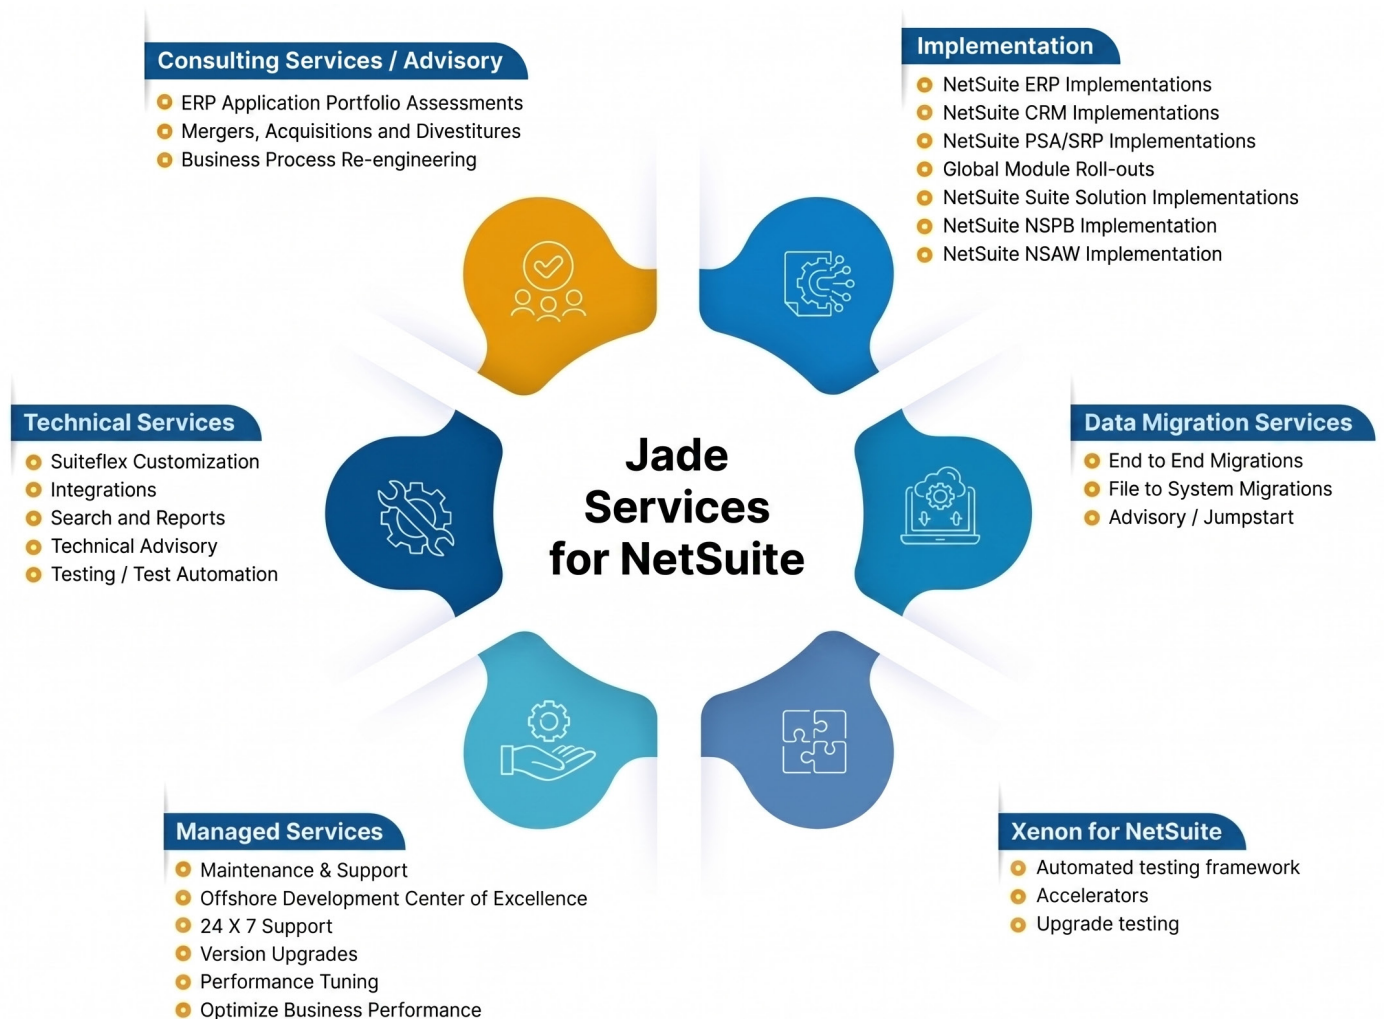

Expand Globally

Manage subsidiaries, currencies, and taxes with ease.

Monitor KPIs Instantly

Leverage real-time dashboards and analytics.

Jade Global:

A trusted NetSuite partner

Jade Global is multi-cloud experts who offer the perfect blend of end-to-end services portfolio and agility that very few NetSuite partners in North America can match. We work closely with your ISV ecosystem, enabling us to deliver value that extends beyond ERP, applications, and platforms. Our holistic approach ensures your entire IT landscape is seamlessly integrated, helping optimize operations, accelerate innovation, and drive long-term business success.

Quality and Compliance

“

I appreciate Jade Global's hard work and perseverance in getting NetSuite live in Germany on November 2, 2022, expanding Beauty Health's global infrastructure and core ERP platform to a significant international business location. Jade Global developed dozens of integrations, workflows, forms, and configurations, all while keeping pace with the needs of our business and the challenges with our external logistics vendors. Each team member gave 100% and ran the project in a highly thoughtful way, keeping up with the time and best practices of global implementations. Well done by all! This success gives us the confidence to plan next for NetSuite in France & Spain.

”

Jeff Wills

SVP, Global Head of Business Technology, HydraFacial

“

Making the leap from on-premises to the cloud wasn't just about the mandate to modernize; we were looking for more agility, reliable connectivity for our remote workforce, and infrastructure cost optimization. Jade Global helped us tap into our trapped data and streamline our operations through automation. It was essential to fulfill the transformational needs of clients with optimism and confidence.

”

NetSuite Assurance Services

You've built a great business, and now you're ready to scale and take your business to the next level.

Xenon for NetSuite

Do you need to implement NetSuite automation or prepare for your next upgrade?

“

We are live with the new version of scripts in the finance and custom records modules in NetSuite. This project is important as we are moving away from using older versions of scripts following our OCI migration. This upgrade is crucial as it enhances scalability and allows us to use new features in the future.

The transition has posed a significant challenge, especially in identifying various UAT users, coordinating time with them, and effectively communicating the reasons behind this change. However, with the collective efforts of the team, we have achieved success.

”
